Bill:

Our invoice to you for the first sample analyses by Aspen was returned, with the postal note saying there is no box to place the mail. Tracey will call you to see if your way of receiving mail changed. It's also possible we just wrote down your address incorrectly.

WEC only called me once and I said I needed your "ok" to answer any of their questions. I also need to inform you that I have also been previously hired by WEC to conduct testing in their own facility. Being that this previous project through WEC and your project are unrelated I had no need to inform you. But, if I end up being an expert witness, this should be disclosed to you.

With your okay, I will answer WEC questions regarding where and how I collected the samples, but I won't answer any questions that deviate. You can also copy and paste this message to WEC if they are interested in calling me and you are okay with me answering these questions.

Sincerely,

**Cassidy Kuchenbecker, MS**

Ok sounds good. How do I give answers as far as the sampling is concerned. WEC has already made many comments that your avoiding them. I know Aspen has talked with news paper. The problem I have is aspen did not take the samples, you did. Their ESM tests are on your slides. I need to reconcile the two

Bill

I prefer to stay out of media on projects until they resolve. I'll leave the public comments to your legal representative.

Sincerely,

Cassidy Kuchenbecker, MS

Hello Bob D. and Cassidy K,

There are going to be several media resources calling you regarding the findings of coal and or fly ash from the samples taken from my home. You have my permission to discuss these matters, as long as it pertains to either coal dust and or fly ash.

Thank you

Bill Pringle
